

Please dont do away with the cw requirement. This is all thats keeping thousands of cb types off our bands. Most of these types are unelmerable. Most are 25 year veterans of cb and refuse to change their habbits. Please listen to the 11 meter circus and realize that our hf freq's will become exactly like what you hear on 11 meters. Please dont do away with or change the code requirement in anyway.

Thanks

John WR8D
